

INTRODUCING THE
EcO3ICE
ICE MACHINE
SANITIZER

SANZONATE™

SIMPLE, SAFE & EFFECTIVE

The compact EcO3Ice device safely treats incoming water to sanitize the ice-making process.

**SUPPLIES AQUEOUS OZONE TO
INCOMING WATER LINE OF ALL
SIZE ICE MACHINES.**

AQUEOUS OZONE ON DEMAND

The EcO3Ice delivers Aqueous Ozone to safely kill bacteria throughout the ice-making path, and treating the source water for taste and odor. With each ice making cycle, the EcO3Ice unit generates an effective amount of ozone infused into the water for natural sanitation of the ice storage bin and the ice product itself.

BENEFITS TO USER

Treats Full Ice Path for Taste, Odor, and Bacteria.

Delivers a SAFE Ice Product for Employees and/or Customers.

Improves Health Inspection Results.

Saves as much as 75% on Labor to Clean Ice Machines.

Simple Installation and Cartridge Replacement.

Safe, Effective, Economical, and Sustainable.

FDA and USDA Approved as a Safe Food Contact Agent.

EPA Registered and Regulated.

Green Seal Certified.

National Restaurant Association Kitchen Innovation Award Winner.

SYSTEM FEATURES

On-site, On-demand Generation of Ozonated Water.

Available in 3 Sizes based on Water Volume of Ice Machine.

Up to 50,000 Gallons of Water Flow per
Cartridge Life (6-24 months).

Unit weighs just 2 lbs.

Compact Dimensions of 3" x 4" x 7".

Replaceable Twist-on Cartridge System that
fits all EcO3Ice Units.

One-year Product Warranty.

AQUEOUS OZONE ON DEMAND TECHNOLOGY

SANZONATE™

SIMPLE, SAFE & EFFECTIVE

Sanzonate's Aqueous Ozone technology simply converts potable water into ozonated water. This highly oxidized water is a powerful antimicrobial agent that safely and effectively inactivates most bacteria and viruses at >99.999% in less than 30 secs. Aqueous Ozone is also a very versatile solution that can be utilized to clean and deodorize in any environment.

WHAT IS AQUEOUS OZONE?

In nature, ozone is formed by lightning causing an ordinary oxygen molecule (O₂) to split into two oxygen atoms (O), which rejoin the ordinary molecules (O₂) to form Ozone or O₃. Ozone can also be synthesized or man-made by combining an electrical charge with oxygen creating O₃ which is infused into water. Thus, the term Aqueous Ozone.

Our EPA registered technologies allow our customers to safely and effectively sanitize, clean, and deodorize any environment without the use of chemicals.

WHAT ARE THE BENEFITS OF AQUEOUS OZONE?

Generates an Endless Supply of a Safe, yet Highly Effective Sanitizer and All-purpose Cleaner.

Saves up to 80% in Monthly Costs for Traditional Chemical-based Cleaning/Disinfecting Agents.

Produces On-site, On-demand Ozonated Water at about 1 penny per gallon.

No Chemicals to store, mix, transport, handle, dispense, etc.

No PPE Requirements for staff or other personnel to dispense and apply the ozonated water.

Unique, Patented Technology.

Inactivates Viruses & Bacteria with an efficacy of 99.999% in 30 seconds or less.

Tested as a Sanitizer and a "Green" Cleaner on Stainless Steel, Ceramic Tile, Glass, Porcelain, Plastic and Porous Surfaces.

FDA Granted GRAS (Generally Recognized as Safe) Approval. Allows ozonated water on food and food contact surfaces.

USDA/FSIS Granted Approval. Ozonated water is safe and suitable for use in the production of meats and poultry.

USDA National Organic Allowed Substance. Ozonated water listed as "organic".

EPA/FIFRA Registered & Regulated. Ozonated water products are recognized as an antimicrobial device.

OSHA Standards. Ozonated water devices meet standards to protect workers from any harmful exposures.
