

INTRODUCING THE

ENOZOPRO

HANDHELD SPRAY BOTTLE

SIMPLE, SAFE & EFFECTIVE

The EnozoPRO Aqueous Ozone Spray Bottle replaces traditional cleaners and sanitizers by converting potable water to ozonated water.

AQUEOUS OZONE ON DEMAND

The EnozoPRO utilizes a trigger-activated pump drawing upon tap water to create ozonated water on-demand. These handheld 14 oz. spray bottles on average can be recharged up to 5,000 times replacing thousands of gallons of traditional chemical-based sanitizers and cleaners.

BENEFITS TO USER

Sanitizes, Cleans, and Deodorizes all Surfaces

Up to 80% Savings in Chemical-based Cleaning & Sanitizing Agents

Safe, Effective, Economical, and Sustainable

Lightweight and Durable Handheld Bottle

Easy-to-Use, Rechargeable

FDA and USDA Approved as a Food Sanitizer

EPA Registered and Regulated

Green Seal Certified

SYSTEM FEATURES

On-site, On-demand Generation of Ozonated Water

Up to 5,000 Refills per Battery Life or 545 Gallons

Unit weighs just 2 lbs.

Dimensions of 4" x 4" x 11"

Water Reservoir Capacity of 14 oz.

Rechargeable Lithium Ion Battery

Two-year Product Warranty

AQUEOUS OZONE ON DEMAND TECHNOLOGY

SANZONATE™

SIMPLE, SAFE & EFFECTIVE

Sanzonate's Aqueous Ozone technology simply converts potable water into ozonated water. This highly oxidized water is a powerful antimicrobial agent that safely and effectively inactivates most bacteria and viruses at >99.999% in less than 30 secs. Aqueous Ozone is also a very versatile solution that can be utilized to clean and deodorize in any environment.

WHAT IS AQUEOUS OZONE?

In nature, ozone is formed by lightning causing an ordinary oxygen molecule (O_2) to split into two oxygen atoms (O), which rejoin the ordinary molecules (O_2) to form Ozone or O_3 . Ozone can also be synthesized or man-made by combining an electrical charge with oxygen creating O_3 which is infused into water. Thus, the term Aqueous Ozone.

Our EPA registered technologies allow our customers to safely and effectively sanitize, clean, and deodorize any environment without the use of chemicals.

WHAT ARE THE BENEFITS OF AQUEOUS OZONE?

Generates an Endless Supply of a Safe, yet Highly Effective Sanitizer and All-purpose Cleaner.

Saves up to 80% in Monthly Costs for Traditional Chemical-based Cleaning/Disinfecting Agents.

Produces On-site, On-demand Ozonated Water at about 1 penny per gallon.

No Chemicals to store, mix, transport, handle, dispense, etc.

No PPE Requirements for staff or other personnel to dispense and apply the ozonated water.

Unique, Patented Technology.

Inactivates Viruses & Bacteria with an efficacy of 99.999% in 30 seconds or less.

Tested as a Sanitizer and a "Green" Cleaner on Stainless Steel, Ceramic Tile, Glass, Porcelain, Plastic and Porous Surfaces.

FDA Granted GRAS (Generally Recognized as Safe) Approval. Allows ozonated water on food and food contact surfaces.

USDA/FSIS Granted Approval. Ozonated water is safe and suitable for use in the production of meats and poultry.

USDA National Organic Allowed Substance. Ozonated water listed as "organic".

EPA/FIFRA Registered & Regulated. Ozonated water products are recognized as an antimicrobial device.

OSHA Standards. Ozonated water devices meet standards to protect workers from any harmful exposures.
